

# 1835 MINIATURE BAYONET BASED LED LAMP, WIDE ANGLE in **BRIGHT WHITE**

## **LED Advantages**

- Up to 90% Energy Savings Over Incandescent Lamps
- Long Life, 100,000 hrs, over 10 years!
- Increased Safety, no glass that can shatter
- Reduced Re-lamping Labor Costs
- Shock and Vibration Proof
- Lower Operating Temperature

## **Replaces Miniature Lamps:**

1835

Available in Single Chip or Domed

## **Color Availability:**

**Bright White**, which will illuminate any colored lens, including red, green, amber, yellow, or blue.

*One lamp for all of your color needs!*

## **SPECIFICATIONS**

Lamp Shape: T3 1/4  
Base Style: Miniature Bayonet BA9s  
Length MOL: 1.10"  
Diameter MOD: 0.40"  
Volts: Designed for 55 volt Use  
Operates from 55-130 volts AC or DC  
Current 20 ma

## **Bi-Polar**

Color: **Bright White**

A bright LED for direct replacement of Miniature Bayonet Based incandescent lamps. It has a built-in diffuser for wide angle viewing.

**Low current consumption saves energy.**

These bright LEDs are ideal for mission critical applications such as power plant and utility displays, industrial equipment, and elevator controls. A molded diffuser lens increases the viewing angle making this LED more suited for use behind larger displays, switches or lens covers. Long-life, low power consumption, shock resistance, and extreme thermal tolerance make LEDs ideal for harsh industrial environments.
