

# T3-1/4 (9mm) LED Miniature Wedge Based

## ***Replaces miniature lamps:***

159, 259, 535, 1995-7 (5V); 194, 658, 936,  
2080 (12/14V); 656, 657, 400, 655 (24V);  
264, 856, 857 (28V)

***Colors available:*** Red, Green,  
Amber/Yellow, Blue, and White

## **Please Note:**

*For optimum brightness and color saturation,  
please select the LED color closest to the color of the  
lens or diffuser the LED will be used with. White  
LEDs should only be used with clear or white  
frosted lenses.*

*Low current consumption  
saves energy.*

## ***SPECIFICATIONS***

**Lamp Shape:** T3 1/4 (9mm)  
**Base Style:** Miniature Wedge  
**Length MOL:** 1.06 inches  
**Diameter MOD:** .40 inches  
**Volts:** 5-28  
**Operation:** AC or DC

## ***LED Advantages***

- **Up to 90% Energy Savings Over Incandescent Lamps.**
- **Long Life, 100,000 hrs, over 10 years!**
- **Increased Safety, no glass that can shatter**
- **Reduced Re-lamping Labor Costs**
- **Shock and Vibration Proof**
- **Lower Operating Temperature**

These bright LEDs are ideal for mission critical applications such as power plant and utility displays, industrial equipment, and elevator controls. Long-life, low power consumption, shock resistance, and extreme thermal tolerance make LEDs ideal for harsh industrial environments.
