

## LED BIG E BULB

EGLED-200SN 200-watt

### A Smart Green Solution for 400 Watt Metal Halide Replacement in High / Low Bay Retrofits

The EGLED-200SN "LED BIG E BULB" is a direct replacement for 400 watt metal halide lamps.

Simply screw the bulb into the fixture with no need to bypass the ballast.

Additional advantages against a regular metal halide are higher lumen maintenance, instant on and restrike, no color change, better color temperature, higher color rendition index (CRI) and cooler running temperature.

### Features and Benefits

- **No need to bypass ballast.**
- Instant on and instant restrike.
- Directional light output producing a much brighter work area.
- Cool running lamp to help reduce heating and air conditioning bills.
- -4°F to 113°F operating temperature.
- No mercury, UV or IR light radiation.

Note: Will not work with Electronic Ballast.

For M59 and M155 only.

Do not install into High Pressure Sodium or Mercury Vapor.

Do not bypass ballast as fully functional unit is required.

Watts	200 Watt
Lumens	20,000 Lumens
Voltage	120V through 480V
Beam Angle	95°
Color Rendering Index	80
Color Temp.	5000 K
Operation Temp.	-4°F to 113°F
Base	EX-39 Mogul Base
Life Hours	50,000
Warranty	5 Years
