ELECTRICAL SPECIFICATIONS
If an AC generator is used to back up the signs, a surge suppression device is recommended to protect the entire emergency circuit.

EXTERNAL SPECIFICATIONS
The QUADRA is constructed from durable extruded aluminum. The unit comes standard with a white baked powder coat finish. Available in custom poxy-based powder coat finishes (please specify). Single, double or universal face versions must be specified. Universal mounting pattern and key hole slots are stamped into the backplate. The self-powered version comes standard with an external LED status indicator and test switch.

INTERNAL SPECIFICATIONS
AC ONLY, AC/DC and SELF-POWERED: comes standard configured with high-output LED technology and 120/347VAC input. Nickel-cadmium batteries provide a minimum 30 minutes of emergency duration. Optional 90 or 120 minute duration battery is available. Solid state charger & transfer.

BATTERY TECHNOLOGY
The QUADRA-SP is designed with a maintenance free, nickel-cadmium battery providing a minimum emergency duration of 30 minutes. An optional 90 or 120 minute nickel-cadmium battery is available. Recharge time of the battery is 24 hours.

SUPPLEMENTAL TEXT
A running man sign with supplementary "EXIT" or "SORTIE" text is also available in the QUADRA model. To designate "EXIT" add "-E" to the end of the pictogram nomenclature, for "SORTIE" add "-S". For example, a sign with supplementary "EXIT" text and the indicator down to the right would have "DR-E" as it's pictogram nomenclature.

UNIVERSAL PICTOGRAMS
The OLR (Universal) option includes: a pictogram with no directional indicators, a pictogram with a left facing directional indicator and a pictogram with a right facing directional indicator.
